As a software consultant at Quandary Peak Research, I specialize in providing expert analysis and consulting on matters of patent infringement and trade secret misappropriation. With a strong foundation in computer science from Louisiana Tech University, I have honed my skills in programming, operating systems, database engineering, networking, digital forensics, cryptography, reverse engineering, and a focus on cybersecurity.

My experience spans several high-profile litigation cases across various jurisdictions, including the United States International Trade Commission and multiple US District Courts. Notable cases I have worked on involve complex technical issues in the fields of electronics, semiconductor devices, and digital technologies.

I am dedicated to leveraging my technical expertise and litigation experience to support clients in navigating the intricate challenges of technology-related legal matters.
